

Allele

mTFP-nAb Magnetic Agarose

Optimized by the research scientists at Allele Biotechnology, mTFP-nAb™ is a highly specific mTFP1/mWasabi binding protein derived from camelids. It is characterized by a small size (13 kDa) and a very high stability (stable up to 70°C, functional in high salt concentrations or 0.5% SDS). One molecule of mTFP-nAb™ binds one molecule of mTFP1/mWasabi with a dissociation constant (Kd) in the nanomolar range. This makes mTFP-nAb™ Magnetic Agarose beads the ideal candidate for a variety of biological assays.

mTFP nAb™ is an excellent antibody for immunoprecipitation, and should make mTFP1/mWasabi a very useful tag for immunoprecipitation assays.

Applications

- Immunoprecipitation / CO-IP
- Quantitative analysis
- Chromatin Immunoprecipitation (ChIP)
- Identifying Interacting Proteins
- RIP Assays (RNA Immunoprecipitation)
- CLIP Assays (in vivo Cross Linking and Immunoprecipitation)

Technology

Antibodies - extremely powerful tools in biomedical research - are large complex molecules (~ 150 kDa) consisting of two heavy and two light chains. Due to their complex structure, the use of antibodies is often limited and hindered by batch-to-batch variations.

Camelidae (camels, dromedaries, llamas and alpacas) produce functional heavy chain antibodies (hcAbs) devoid of light chains. hcAbs recognize and bind their antigens via a single variable domain (VHH). These VHH domains are the smallest intact antigen binding fragments (~ 13 kDa).

Product Info

Cat.#	Qty
mTFP nAb™ coupled to Magnetic Agarose Beads Provided as a slurry in PBS pH 7.4 with 20% ethanol Binding capacity - minimum 4ug mTFP/mWasabi per 10ul of slurry	
ABP-nAb-MTFPX025	250 µl (10 rxn)
ABP-nAb-MTFPX050	500 µl (20 rxn)
ABP-nAb-MTFPX100	1.0 ml (40 rxn)
mTFP nAb™ purified protein	
ABP-nAb-MTFPAB	250 µl (1mg/ml)
mTFP nAb™ Kit	
ABP-nAb-MTFPXK20	20 Reactions
Kit Contents	
Wash Buffer Lysis Buffer	Binding Buffer Elution Buffer Neutralization Buffer

For Research Use Only. Not for Diagnostic or Therapeutic Use.
